

SBB-800-1200

Steel band oiling

Technical data

Electr. connection:	400 V 3-phase current, 16 A
Compressed air connection:	6 bar, oil-free
Working pressure:	0.1 - 0.5 bar
Band widths:	800 mm 1000 mm 1200 mm
Weight:	approx. 170 kg

Features

SBB-800-1200 steel band oiling

optimum and precise quantity control of the release agent on all steel band ovens

DÜBÖR automatic nozzles

spraying with low-pressure for an optimum release process

Automatic release agent supply

all containers connected directly or via a central supply unit

High-quality construction

all components in stainless steel and corrosion-protected components

Pneumatic linear drive for nozzles

uniform distribution over the steel band

Spreader behind the spray area

uniform application, optimum distribution, better quality pastries

Electric release agent controller

saves on raw materials, less mess

DÜBÖR®
